

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

A DICTIONARY
OF
ENGLISH SYNONYMES

AND
SYNONYMOUS OR PARALLEL EXPRESSIONS

DESIGNED AS A PRACTICAL GUIDE TO APTNESS AND VARIETY
OF PHRASEOLOGY

By RICHARD SOULE

The exertion of clothing a thought in a completely new set of words increases both clearness of thought and mastery over words. It is the test of a solid thought that it will bear a change of clothing. — J. R. SEELEY.

CAMBRIDGE:
PRESS OF JOHN WILSON AND SON.

P R E F A C E.

THE main design of this Dictionary is to provide a ready means of assistance when one is at a loss for a word or an expression that best suits a particular turn of thought or mood of the mind, or that may obviate an ungraceful repetition. Even practised and skilful writers are sometimes embarrassed in the endeavor to make a sentence more clear, simple, terse, or rhythmical, by the substitution of one form of diction for another. It is presumed that they, as well as novices in composition, will find the present work useful in overcoming difficulties of this sort.

As to the method of using it: Whenever a doubt arises in regard to the fitness of any word, and a better one is not readily suggested, let the writer turn to this word in its alphabetical place. Under it will be found the words and phrases, or some clew to the words and phrases, which, in any connection, have the same meaning as itself, or a meaning very nearly the same. That one of them, which comes nearest to expressing the exact shade of thought in the writer's mind, will be likely to arrest the attention and determine the choice.

In most cases, all the words that belong to any group will be found in that group. But in some instances, as when the same word falls into two or more groups that are near to each other, or when there are so many synonymes for a word that a repetition of every one of them under each in its alphabetical place would seem to be too formal and prolix, the inquirer is referred to some prominent word among them for a view of the whole. Under the word *Blockhead*, for example, reference is

made to the word DUNCE, — printed, for this purpose, in small capitals, as here, — under which will be found all the words that are synonymous with it. This example is given because it is the most marked one in our language of a multiplicity of terms for the same idea.

Many nouns ending in *ness*, and adverbs ending in *ly*, have been omitted in their alphabetical places, for the reason that their synonymes are sufficiently indicated by the corresponding adjectives.

The aim has been to present at a single glance the words or modes of speech which denote the same object, or which express the same general idea, with only slight shades of difference. There has been no attempt at elaborate discussion of the nice distinctions that obtain between words apparently synonymous; but hints of such distinctions have been given whenever it was practicable to give them briefly in a parenthetical remark.

In preparing this Dictionary, free use has been made of the following works: Roget's Thesaurus of Words and Phrases; the Quarto Dictionaries of Webster and of Worcester; Crabb's Synonymes; Graham's Synonymes; Whately's Synonymes; Platt's Synonymes; the Dictionaries of Synonymes by Fenby, Sherer, Mackenzie, and Smith; the Medical Dictionaries of Dunglison and of Thomas; and the United States Dispensatory by Wood and Bache. It contains much, however, that has been gathered from a wide field of miscellaneous reading during a long series of years.

The author is under special obligations to his friends Mr. JUSTIN WINSOR, Mr. WILLIAM A. WHEELER, and Mr. LOOMIS J. CAMPBELL, for the interest they have manifested in the progress of the work, and for their valuable suggestions and criticisms.
